

Three hundred years ago, according to the legend, a century before the French Revolution, was constructed a modest cottage in a wooded zone, a valley between the Mediterranean sea and the Pyrenees, a magical place that already had been refuge of the diverse personages. It was there, from 1234, a military defence tower, that still is raised on our heads and from where can be observed the valley, and from it, the wise Joan Salvanera made construct Salvanera, with the drawing from old planes found near a lake and of a dormen volcano, as it had predicted in one old prophecy. The first that he did was to celebrate the wedding of his daughter, the beautiful Elisenda Salvanera i Elias, with his cousin Pere Jaume Salvanera, and to mark the date in one of the columns of the hall, to indicate that all celebration and all stay were well received there.

It was the son of both, Hug Pons Salvanera i Salvanera who picked up the writings that his grandfather Joan had left like testament for his heirs, and found among them a titled text Narragoniae Annualia, of a Flemish mystic called Jacob van Nelle, whose word said the following words "Two equal names must accompany the name from the christianism, two names that save twice the dark colour that blesses the place, in the place where the fruit of the blood germinates". It was written in Rotterdam the 5th of May of 1555, with an explanation of his grandfathers, Joan what they meant those words: "The first man who is twice named Salvanera must construct a stone place and plant in the middle of it a dry source. When from that source germinates a tomato plant, will arrive the second man, also with both Salvanera last names, and he will discover the form to turn the lead into gold.

Following those instructions, Hug Pons Salvanera i Salvanera made construct the stone place that there is in front of the house in 1766, and it did it following the indications of a Persian wise Maisonidas, with the constellations of Orion and Perseus as a reference. Nowadays the place still it can be admired and the dry source, and both wait for the arrival of the man with Salvanera last names, when the tomato plant it will germinate.
